Quarterly Project Progress Report

UPPER SALMON RIVER
CHINOOK SALMON REARING PONDS

Project No. 88E22030

Contract No. 03-6-208-35444

Period Covered: January 1, 1977 to March 31, 1977

Columbia River Fisheries Development Program

May, 1977

Pahsimeroi Rearing Pond
(Summer Chinook)

A total of 240,380 summer Chinook fingerlings at 135 per pound were transported to and planted in the Pahsimeroi River rearing pond during March. These fish had been reared at Mackay Fish Hatchery. The Chinook remained in the pond throughout the remainder of the quarter and were fed daily with Oregon Moist Pellet. We estimated 238,000 fish at 124 per pound and 72 mm in length on hand at the end of the quarter.

Decker Rearing Pond
(Spring Chinook)

Inactive during this quarter.
